

Abnormal Bleeding Symptom Checker

The Gynae Centre

Our abnormal bleeding symptom checker can help you get a sense of the possible issues your irregular bleeding could signal, but remember, a quick reference chart is **not a diagnosis** in any way. Don't panic or dismiss your symptoms. Seek guidance from your healthcare provider. You can make an appointment

Irregular periods	Bleeding between periods?	Bleeding After sex?	Pain during sex?	Bleeding is heavy?	Pelvic pain outside of your normal period pain?	Gone through the menopause?	Are you pregnant?	Have you gained weight?	More painful periods	Excess body hair	Unusual vaginal discharge	Pain when passing urine	Heavier periods	More frequent urge to urinate?	Bloating	Common symptoms associated with
